Sir:

It is noted that a combination of Applicant and Patent Office errors appear in this patent of a typographical nature or character and correction thereof does not involve such changes in the patent as would constitute new matter or would require reexamination. A certificate of correction in the form attached hereto is requested.

Claim 7, as currently numbered, contains a USPTO typographical error in the spelling of "method," which is incorrectly printed as "methud."

As discussed and agreed in the telephone conversation of September 24, 2004, claim 2 of U.S. Patent 6,783,980 B2 was mistakenly included in the Patent during prosecution when the nature of the claims was changed. Claim 2 is currently under examination in a continuation application and should have been canceled during prosecution of the present Patent. Deletion of dependent claim 2 does not constitute new matter or require reexamination, as the correction has

no effect on the scope of the remaining claims. Removal of claim 2 merely corrects a clerical error, whereby cancellation of a dependent claim, which is directed to a product-by-process claim pending in a continuation, was inadvertently overlooked.

Correction of the indicated clerical and typographical errors does not constitute new matter or require reexamination. Correction is respectfully requested.
